Strachauer Park B Roadway Improvements

Dear Resident:

Neighborhood Reconstruction Schedule

By the end of the day, all major utility upgrades to the water, sanitary sewer and storm sewer systems will be complete.

During the week of May 19, crews will begin roadway surface pavement reclamation. This is the process of grinding the pavement to produce a gravel product that will be used as a recycled gravel base material in the new roadbed. Crews will follow the grinding machine to shape and compact the gravel. Crews will install "No Parking" signs in areas where they will be working in. This will leave the entire roadway open for them to work. The roadway will be open during the reclamation processes, with isolated closures in areas where crews are working. Please use caution when driving through these areas.

Late next week, crews will begin to re-grade the roadway on York Avenue and W. 62nd Street. This process will be very involved and will include large equipment and trucking of materials around the jobsite. Notices pertaining to parking will be distributed, as access to your homes during the day will be limited while they grade the roadway in front of your home. If you have any special needs or questions, feel free to ask one of the workers or me for assistance.

Crews will continue installing a new sump drain tile line behind the existing curb in the boulevard on Abbott and Zenith avenues. The pipe will be installed 2 to 3 feet underground and connected to the existing storm sewer system. The purpose of the line is to provide a service connection for discharges from private sump pumps, roof drains and other drain tiles. All residents with sump pumps and roof drains who discharge at the curb or within the right-of-way should use this service. Please feel free to ask me if you have any questions.

Please be aware of where crews are working as the roadway may be blocked for some time as they dig to replace utilities.

Private Utility Reconstruction Schedule

CenterPoint Energy will soon complete upgrades its infrastructure. Restoration of any disturbed lawn areas near the roadway will be completed later this year as part of the neighborhood reconstruction project. CenterPoint Energy will complete any restoration up by your home in a few weeks.
